

Hoàng Phương

Better code, better life.

PERSONAL INFORMATION

- 23/11/2001
- 0869.227.057
- hoangphuong.work01@gmail.com
- Thanh Xuan - Ha Noi

TECHNICAL EXPERTISES

- **Programming skills:** PHP, Laravel, VueJs, Livewire, AlpineJs, Web API, Javascript, XML, Ajax, jQuery
- **Database platforms:** MySQL, SQLite, MS SQL
- **Search Engine:** Elasticsearch, Sphinxsearch
- **Methodologies and practices:** OOP, Design patterns
- **IDEs:** VSCode, PhpStorm, SublimeText

CAREER HIGHLIGHTS

- 3 years+ of experienced working PHP, Laravel
- Experienced in VueJs, Livewire, AlpineJs, website SEO, optimize SEO
- Experienced in analyzing and designing databases: MySQL, MSSQL
- Experienced working with search engines: Elasticsearch, Sphinxsearch
- Technology analysis and application integration with appropriate third-party libraries
- Have experienced developing software according to microservice architecture
- Knowledge of Docker, AWS, Google Cloud

PERSONAL ATTRIBUTES

- Responsible, careful in all assigned tasks.
- Can research new technology quickly.
- Able to work in a team or independently.
- Ability to work under high pressure
- Well experienced in the software industry
- A friendly, enthusiastic person. Has good communication and presentation skills

WORK HISTORY

VNP Group 10/2022 – Present

Roles and Responsibilities

- Full stack developer

I. Developing the search document system

Duration	10/2022– Present
Position	Developer
Project Description	Customer search algorithm for search engine (SphinxSearch, Elasticsearch) System construction search document for trading platform document(123docz.net)
My Responsibilities	Coding Research Maintenance
Technologies	PHP, Laravel, Livewire, AlpineJs MySQL Sphinxsearch, Elasticsearch

II. Developing the document crawl system

Duration	10/2022 – Present
Position	Developer
Project Description	The system retrieves document files from the original links of google driver or domestic document domains Provide this service for the system of document posting events on 123docz.net
My Responsibilities	Coding Research Maintenance
Technologies	PHP, Laravel MySQL

III. Developing a system to convert and check duplicate documents

Duration	10/2022 – Present
Position	Developer
Project Description	Convert between document formats (PDF, DOC, DOCX, PPTX, PPS, ...) System builder check duplicated document
My Responsibilities	Coding Research Maintenance
Technologies	PHP, Laravel MySQL Elasticsearch

Roles and Responsibilities

- Full stack developer

I. Developing the boxing association system ... Japanese

Duration	06/2021 – 10/2021
Position	Developer
Project Description	A product of Rabiloo company, the boxing association system
My Responsibilities	Coding Bug fixing
Technologies	PHP, Laravel MySQL Docker

II. Developing a matching system between job seekers and medical facilities such as hospitals, private clinics ... Japanese

Duration	10/2021 – 02/2022
Position	Developer
Project Description	A product of Rabiloo company, the connection system between hospitals and people in need looking for a job
My Responsibilities	Coding Bug fixing
Technologies	PHP, Laravel MySQL VueJS Docker

III. Developing an instagram account analysis system

Duration	03/2022 – 08/2022
Position	Developer
Project Description	A product of the Rabiloo company, instagram account evaluation and analysis system
My Responsibilities	Coding Graph API Facebook Research
Technologies	PHP, Laravel MySQL, Elasticsearch VueJS Docker

Education 2019 – 2022

Bach Khoa IT Academy - Hanoi University of Science and Technology

I. Building and developing a system for managing showtimes and selling cinema tickets (projects, research works, ...) for web programming at the academy

Duration	08/2020 – 03/2021
Position	User Interface (UI) design Backend logic handling Analyzing and designing databases
Project Description	Manage showtimes of cinemas Sell movie tickets to customers, collect and exchange vouchers Statistics and notification of system revenue for each role Auto-suggest and schedule trending movies
My Responsibilities	Team leader Coding Bug fixing
Technologies	PHP, Laravel, VueJS MySQL Docker

II. Completing the system of managing showtimes and selling cinema tickets

Duration	01/2022 – 08/2022
Position	Developer, Author
Project Description	Integrating vnPay payment system Laravel Echo integration using redis server as realtime feature
My Responsibilities	Coding Maintain Research
Technologies	PHP, Laravel MySQL VueJS Docker
